Multi Point Backup Solution

MPBS is a complete backup solution, disaster recovery and multi-location backup and retrieval. With the exclusive technology and consulting of our team of experts, your enterprise can not only survive a catastrophe, but thrive while the competition is busy picking up the pieces. We will custom design a plan that will allow even the remote reconstruction of your business from any location.

Unlimited Number of Computers

Backup as many computers as you like using one account. Over 60% of households have more than one computer and PCM allows you to back up and recover from all of your machines. Backup your home, office and laptop computers all on one account for easy access to ALL your files from anywhere.

Unlimited Versions & Powerful Recovery

Keep an unlimited version history of all your files – roll back your books to last years tax records if you wish. Use our time machine feature to go back to the date you want to restore your backup as of and recover that snapshot of files & versions.

Fully Flexible Scheduling

Monthly, weekly, daily, hourly or instant backup.

LiveProtect

Engage PCM LiveProtect to have PCM back up files as soon as a change is detected.

Intelligent File Filters

Tell PCM Online Backup to watch your My Documents folder but to ignore all *.mp3's and *.avi's. Alternatively tell PCM to only protect *.doc, and *.xls. Either use our pre-sets or set your own inclusion/exclusion mask.

Enterprise Compression & Transfer Systems

The PCM compression system only backs up changed files and then only the changed 1's and 0's are transferred. On a 500 MB database (MYOB/Intuit/Turbo Tax) the daily transfer can be as small as 5 KB. Our transfer system is enterprise grade, meaning that large file transfers are resumed at the KB of interruption, and does not start at the beginning like most other online backup systems.

Global Roaming Access to Your Files

Because your data is being backed up daily to the PCM Backup Server Grid - you can access your data anywhere in the world using just a web-browser. Never be without that critical file again.

One-Click File & Folder Sharing

From inside the Online Recovery Interface you can share your files with anyone with an email address. Never have a large attachment bounce again. Just share your already backed-up data with your friends and colleagues. Or if you are a home user – simply share photos or videos.

Archiving

Unlike other online backup systems, we do not delete the file from your backup just because you delete the file from your computer. Over 80% of data loss occurs due to accidental deletion. Rest assured, we keep every version of every file forever, until you tell us to remove it.
